Results Summary

Internal and external growth have provided continuous DPU growth since 2013. 2017 DPU is expected to increase by 2.2% compared to 2016

(Note 1) The forecast figures assume all the anticipated units (9,250 units) to be issued by third-party allotment as was announced in tandem with the public offering in March 2017

Normalized DPU and DPU Sensitivity (vs RevPAR Growth)

- Normalized DPU of JPY 2,710 based on 2017 forecast assumptions
- A 10% increase in RevPAR translates to a +14.6% increase in DPU

RevPAR Growth¹	-10%	-8%	-6%	-4%	-2%	0%	+2%	+4%	+6%	+8%	+10%
Hotel RevPAR²	7,874	8,048	8,223	8,398	8,573	8,748	8,923	9,098	9,273	9,448	9,623

(Note 1) "RevPAR Growth" is shown as a % change from the RevPAR assumption for the 2017 forecast for the 39 hotels with a variable rent scheme owned by INV as of today

(Note 2) "Hotel RevPAR" is average of RevPAR of the said 39 hotels.

(Note 3) "Simulated DPU Growth" is a simulated data based on the normalized DPU, which is annualized, on the assumption that all assumptions for the simulated distribution per unit with regard to all of INV's assets as of today except for the RevPAR remain the same.

Full-year 2017 net income is expected to increase by JPY 446 million YoY, which includes external growth via asset acquisition in March 2017 (+JPY425 million) and internal growth of existing assets (+JPY 234 million)

(JPY million)

(Note 1) Based on 38 hotel properties; of the total 48 hotels in INV's portfolio, 9 hotels with fixed-rent lease agreements as well as one hotel which was renovated in 2016, Hotel MyStays Kanda, are excluded

(Note 2) Based on 66 residential properties owned as of the end of December 2015

(Note 3) Full year rent contribution, minus the increased expenses and ongoing finance costs from the assets acquired in 2016

(Note 4) For the first one month after the hotel acquisition, GOP increases because it is calculated without deducting hotel expenses, which are recorded on a cash basis in the following month, as stated in the lease agreement. Profit decreases after expenses start being deducted from the second month.

(Note 5) One-off financing costs for public offering and debt financing decrease in 2017

(Note 2) "New leases" means the leases with the end-tenants newly signed in 2016 and "new lease rent" means the weighted average of rents as of the end of December, 2016 of new leases based on leased area. All kinds of rent or rent revenue include common area charge. Hereafter the same.

(Note 3) "In-place rent" means the average of rent per month as provided in lease contracts with the end-tenants as of December 31, 2016 weighted by leased area

(Note 4) "Appraisal rent" means the rent per month which is estimated as reasonable by Japan Real Estate Institute based on quality of the property and market value for each room type as of January 1, 2017, and indicates the weighted average per tsubo for the units leased as of December 31, 2016. Appraisal rent does not indicate that the in-place rents with the existing tenants can be increased up to such appraisal rent and also does not guarantee that INV can enter into lease agreements with new tenants at such appraisal rent.

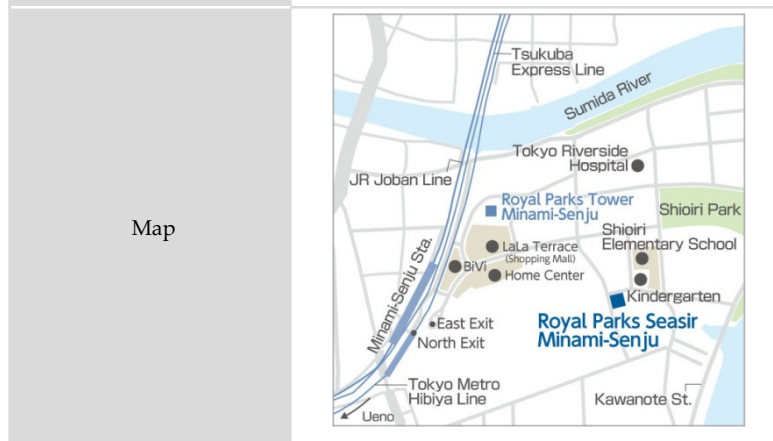

(Note 5) Compared with previous rent

(Note 6) Difference between appraisal rent and in-place rent. Investors should be aware that the above rent gap does not guarantee the increase of rents to fill the gap in a short term or at all

Rent Gap between End-tenant Rents and Master Lease Fixed Rent

The rent gap between end-tenant rents and the master lease fixed rent has grown to over JPY 1,000 per tsubo per month¹; INV may enjoy some upside upon expiry of the master lease in November, 2019²

(Note 1) Calculated by in-place rent including common area charges as of December 31, 2016 divided by leased area as of the same date

(Note 2) The rent gap shows the difference between (i) the actual rent paid by the master lessee under the rent-guarantee type master lease agreement and (ii) the actual rent paid by the end tenants. This rent gap indicates the potential increase in the rental income that INV might have enjoyed if INV had adopted a pass-through type master lease agreement instead of the in place rent-guarantee type master lease agreement. Investors should be aware that the above chart does not guarantee such increase in rental income will be realized upon the expiration of the in place rent-guarantee type master lease agreement expected to be in November, 2019. Moreover, since we do not take into consideration the changes in expenses after adopting a pass-through type master lease agreement, the increase in rental income will not necessarily equal to an increase in NOI of INV

(Note 3) Occupancy is calculated by dividing the sum of total leased area to the end-tenants by the sum of total leasable area at the end of each month

(Note 4) Based on lease agreements effective at the end of each month

- Strong track record of acquiring core assets

Government initiatives drive further growth

■ Japan Revitalization Strategy 2016

- As the third arrow of Abenomics, the Cabinet established the “Japan Revitalization Strategy” on June 2, 2016, positioning tourism as one of the key industries of Japan. The Government will deploy effective measures comprehensively and strategically
- Aim to increase foreign visitors from 19.7 million in 2015, to 40 million in 2020 and 60 million in 2030
- Aim to boost foreign visitor consumption from JPY 3.5 trillion in 2015 to JPY 8 trillion in 2020 and JPY 15 trillion in 2030
- Relax visa requirements, expand consumption tax refund system, strengthen air transport network including increasing landing slots for international flights to/from Tokyo International Airport (Haneda Airport), enhance ports for cruise ships (aiming for 5 million passengers by 2020), and improve access to Haneda Airport / Narita International Airport by trains and buses, etc.

■ Other Measures

- Japan plans to implement a preclearance program to streamline the immigration and customs process in Japan. Japan aims to implement the program by 2017 starting with South Korea and Taiwan

Eight of the top 10 airports have further plans to increase capacity

Enhance Airport Capacity

Tokyo International Airport (Haneda Airport) / Narita International Airport

- Increase international flight capacity by building or extending runways as both airports will reach their annual capacity limit of 750,000 landing slots by early 2020 according to the government's forecast
- Haneda Airport will undergo a large-scale renovation in response to an expected surge in flight numbers prior to the 2020 Olympics
- The number of landing slots at Haneda Airport is expected to increase by up to 39,000 from the current 447,000 annually by 2020, mainly by establishing new approach routes over central Tokyo
- Narita International Airport opened an exclusive LCC terminal in April 2015, increasing flights bound for Asia including Taiwan and Hong Kong. (Note 1) Based on the properties owned at the end of period. 63 properties for 2013, 63 properties for 2014, 66 properties for 2015, and 68 properties for 2016
 (Note 2) Occupancy is calculated by dividing the sum of total residential leased area by the sum of total residential leasable area at the end of each month of each year
 (Note 3) Net Leasing Cost (Multiple of Monthly Rent) = Advertising Expenses (Multiple of Monthly Rent) + Free Rent (Multiple of Monthly Rent) - Key Money (Multiple of Monthly Rent)

 (Note 5) Weighted average of monthly rent increase or decrease (%) of new or renewal contracts, or the total of both, compared with previous contracts of properties owned at the end of period

Internal Growth in Residential Portfolio (2016 Actual and 2017 Forecast)

- Sustained proactive asset management resulted in 2016 residential NOI up by 4.4% and rents up by 1.5%

Residential Construction Costs¹

Source: MLIT

(Note 1) Figures are from April 2003 to October 2016. Projected construction cost per unit area as of April 2003 is indexed as 100%. Projected construction cost per unit area = totalized monthly projected construction cost / totalized monthly floor area for type of dwellings used exclusively for living and used also for commerce or other purposes

The population increase in major cities supports INV's well-positioned residential portfolio

Net Migration¹ as Percent of Population² in Major Cities

Source: Ministry of Internal Affairs and Communications and respective cities

(Note 1) Net migration is the difference of immigrants and emigrants with regard to the subject city. A positive value represents more people entering the city than leaving it, while a negative value means more people leaving than entering it

(Note 2) Calculated by dividing net migration of previous year by total population. Total population is as of the end of March for Osaka City and Kobe City, and January 1 for the remaining cities

(Note 3) Percentage of the properties owned by INV in each city in INV's residential portfolio based on acquisition price

LTV(Appraisal Value Base)¹ and Weighted Average Interest Rate²

DSCR

(Note 1) LTV (Appraisal Value Base) is calculated by the following formula: (Interest-bearing debts at the end of the relevant fiscal period) / (Total appraisal value as of the end of the same period)

LTV (Appraisal Value Base) as of March 14, 2017 calculated by the following formula:

(Interest-bearing debts at the end of December, 2016 + Total amount of new borrowings) / (Total appraisal value as of the end of December, 2016 + Total appraisal value for the properties acquired on March 14, 2017 as of December 1, 2016)

(Note 2) The average interest rate is calculated by the following formula: (Total loan amount outstanding at the end of each fiscal period or as of March 14, 2017 multiplied by applicable interest rate at the end of each fiscal period for each loan or as of March 14, 2017) / The loan amount outstanding at the end of each fiscal period or as of March 14, 2017

(Note 3) DSCR is calculated by dividing operating income, as adjusted for depreciation expenses from property rental business and any loss (gain) on sales of property by scheduled prepayments of loans payable and interest expense for the relevant period

(Note 4) DSCR (excluding hotel variable rent) is in the same manner as DSCR, except for excluding hotel variable rent from operating income

Trend of Appraisal Value

Trend of NAV per Unit²

(Note 1) Unrealized Gain = End-of-period Appraisal Value - End-of-period Book Value

(Note 2) NAV per unit is calculated by the following formula: (End-of-period Amount of Net Assets - Undistributed Profit + End-of-period Appraisal Value - Tangible property (including leasehold rights in trust)) ÷ Investment Units outstanding as of the end of each fiscal period; and NAV per unit for the end of December 2016 is calculated based on unaudited financial data.

(Note 3) Unrealized Gain per Unit = NAV per Unit - Book Value per Unit
